Discussion Topic

1. ## Progress
   - Authentication Enabled
   - Conferencing Room development
   - Scheduling
   - Mobile conference

2. ## New Development
   - Record Meeting
   - Technote
   - Version 0.81
   - Source Code

3. ## Architecture

Password Implementation

- By default conference start with authentication.

Password Implementation

- By default conference start with authentication.
- Authentication implemented by change dir in /var/www/bbb-default/index.html

Password Implementation

- By default conference start with authentication.
- Authentication implemented by change dir in /var/www/bbb-default/index.html
- Change page is demo3.jsp

- audio/video/desktop share at client end.

- audio/video/desktop share at client end.
- desktop share is enabled on client by jre.

Conferencing features

- audio/video/desktop share at client end.
- desktop share is enabled on client by jre.
- desktop share jar file is located inside /var/www/bigbluebutton/client

- Create meeting using create.jsp.

- Create meeting using create.jsp.
- email pwd to users.

Scheduling

- Create meeting using create.jsp.
- email pwd to users.
- dataSubmit.jsp,Meetingdetails.jsp pages are used.

Scheduling

- Create meeting using create.jsp.
- email pwd to users.
- dataSubmit.jsp,Meetingdetails.jsp pages are used.
- meeting info also send by sms.

- bbb-app is used to connect the meeting.

- bbb-app is used to connect the meeting.
- salt authentication is need to added on server end.

Mobile Features

- bbb-app is used to connect the meeting.
- salt authentication is need to added on server end.
- mobile_conf.jsp page is use to add password.

- Configured Matterhorn on server with IP 10.107.91.88.

Matterhorn

- Configured Matterhorn on server with IP 10.107.91.88.
- It process the files send by bbb server.

Matterhorn

- Configured Matterhorn on server with IP 10.107.91.88.
- It process the files send by bbb server.
- ffmpeg used to process the file.

Matterhorn

- Configured Matterhorn on server with IP 10.107.91.88.
- It process the files send by bbb server.
- ffmpeg used to process the file.
- Caption can be added to the videos.

Matterhorn

- Configured Matterhorn on server with IP 10.107.91.88.
- It process the files send by bbb server.
- ffmpeg used to process the file.
- Caption can be added to the videos.
- Desktop share need to enable for record the meeting.

- Implemented on windows client.

- Its developer version.

- Its developer version.
- Layout options as per meeting.

BBB 0.81

- Its developer version.
- Layout options as per meeting.
- Bandwidth monitor.

BBB 0.81

- Its developer version.
- Layout options as per meeting.
- Bandwidth monitor.
- Shortcut keys.

BBB 0.81

- Its developer version.
- Layout options as per meeting.
- Bandwidth monitor.
- Shortcut keys.
- New desktop share button.

BBB 0.81

- Its developer version.
- Layout options as per meeting.
- Bandwidth monitor.
- Shortcut keys.
- New desktop share button.
- Color scheme is changed.

BBB 0.81

- Its developer version.
- Layout options as per meeting.
- Bandwidth monitor.
- Shortcut keys.
- New desktop share button.
- Color scheme is changed.
- Whiteboard is improved.

- Source code is downloaded.

Compilation

- Source code is downloaded.
- Compilation of the code after making changes.
